

## GROUP 3

### Perception of Transport Modes

With this survey, we want to understand how residents of Mahé perceive different modes of transport. Knowing how Seychellois people see their current transport system and make transport-related decisions, the Seychelles Planning Authority and the Ministry of Transport will have the required understanding to address transportation issues in and around Greater Victoria.

Note that this survey is intended for residents of Mahé only.

We appreciate your help. Make your opinion count!
